Paper's Please and The Westport Independent played on a delicate balance between moral and repressive regimes, albeit with varying levels of success. However, they have both managed to engage the player in that game of moral tug-of-war, where any initial desire to play the game as a moral and just individual slowly gets crushed under a reality that is survival for you and, in many cases, your family. You are presented with a cross-section of the building, which consists of six apartments and a basement, where Carl lives with his family. You push your way around the apartment building, talk to the people who live there, infiltrate their apartments while they search for contraband and install hidden cameras, and maintain the contents of the building. The game is installed entirely within this single complex; other characters may come and go, but Carl is pumped with pills that prevent him from sleeping and are forced to focus all his attention on six apartments under his control. The game makes you feel both powerful and weak: as a landlord you can save or ruin a life with your intervention, but you still end up owes the laws and regulations of the state.
